

Johnson & Johnson Issues Statement on Ingham Appeal

June 23, 2020

New Brunswick, NJ - We are grateful to the Court for their time; however, we continue to believe this was a fundamentally flawed trial, grounded in a faulty presentation of the facts, and will pursue further review of this case by the Supreme Court of Missouri. We deeply sympathize with anyone suffering from cancer, which is why the facts are so important. We remain confident that our talc is safe, asbestos free, and does not cause cancer.
